Urethane barbell sets

OFIFUB2SETX

Details

Urethane Barbells are manufactured with durability in mind. A thick, shock absorbent and impact resistant layer of Urethane comforts the two solid steel heads, at either end of the bar. The consistent design throughout the range is a bonus for any commercial or home gym. Due to the one piece design no time is wasted changing plates to achieve your desired weight.

Due to the layer of Urethane, the barbells are extremely durable as well as odourless.

The Urethane Barbell is manufactured with knurled sections along the handle that are extremely well positioned for every use - this improves grip as well as comfort during your workout, even when your hands are sweaty.

- Handle length is 965mm.
- Durable - Shock Resistant and Impact Resistant due to the thick layer of Urethane
- One piece design - less time spent changing weighted plates
- Sectional knurled handle enhances grip and comfort throughout your workout, as well as safety
- Manufactured from Odourless Urethane
- Consistent design that is a bonus for any commercial or home gym

Available in three sets:

- LIGHT set of 5 barbells: 1x7.5kg, 1x10kg, 1x12.5kg, 1x15kg, 1x20kg
