Continental "Catcher" for Airtrack

2400ASACXX

Details

We have sold huge numbers of our Airtrack and our customers asked us to develop a landing module to suit it.

We have gone one better and created the Continental Catcher. This is a stand-alone inflatable landing module which suits any pirce of gymnastic apparatus as well as the airtrack.

The Catcher comes in the same huge range of colours as the airtrack and comes with its own hi-power blower to inflate it.

Used at the end of an Airtrack it forms an ideal landing area for your final dismount.

Used at the end of a beam, a vaulting table or horse, a double-mini-tramp or simple trampette it provides a quick to set-up cushioned landing area for practising dismounts.

The Continental Catcher is available in two sizes:

- 4.3m long x 3m wide
- 4.3m long x 3.5m wide

If you purchase a Continental Catcher at the same time as an Airtrack we provide a VELCRO® Fastener flap at the end of the Catcher to attach it to opposite VELCRO® on your Airtrack.

SKU	Options	Available Colours
2400ASAC30	4.3m x 3.0m wide	N/A
2400ASAC35	4.3m x 3.5m wide	N/A
