Impulse RT700 Treadmill

Details

The Impulse RT700 is one of the most popular commercial treadmills we supply. It can be found in facilities across all sectors of the fitness industry, from independent gyms, police and military sites, to schools, colleges and local authority facilities.

This high-quality model is built to last even in high usage situations. It's simple but effective console also offers all the readouts, feedback and workout options users cite as being most important making the RT700 the ideal choice for your facility.

This treadmill boasts a rust-resistant undercoat and a reversible deck allowing for a greater lifespan of the components. The maximum user weight this machine can take is 200kg and it is capable of an incline of up to 15 degrees.

The wide running surface of 59cm (22”), and the quiet operation, gives the user confidence on the machine, and the low profile (step height of only 21.6cm (8.5”)) makes it accessible to a more extensive demographic.

This model also offers a 5 degree inward tilted design to offer a more comfortable position when users step on. A PVC anti-slip side stripe also provides further safety and security.

Features:

- Impact absorption system provides the superior feel for all users, reversible deck for longer life time.
- Low step-up height of 22cm
- Incline range from 0-15%

PLEASE NOTE: This item is delivered flat-packed and requires some self-assembly. Please contact us if you require a cost for installation and commissioning in your facility
