Trampoline - Competition model - 101 Series

230101XXXX

Details

101 series competition trampoline. This trampoline has been certified for use at the very highest levels of trampolining.

Manufactured from heavy duty steel tubing, epoxy powder coated. Easily folded and transported. Supplied with coverall frame pads incorporating flip-out removable sections to reduce creasing of the pads whilst the trampoline is folded, and fixed height roller-stands.

The 101 series also incorporates riser / elevator springs and straps. These are designed to hold the coverall pads slightly raised above the springs ensuring the weight of the pads does not affect the performance of the springs and bed in any way. In addition, by holding the pads clear of the springs, the noise created by the trampoline gymnast is reduced as the pads and springs do not hit against each other.

This trampoline is supplied with either fixed height or hydraulically assisted "Safelift" roller stands. Safelift stands are a strongly recommended optional extra for this larger size heavier trampoline as they make set-up and fold-away easier and safer.

Dimensions:

- Frame size: 5.2m x 3.05m x 1.15m.
- Folded size: 3.05m x 2.2m x 0.8m.
- Bed size: 4.28m x 2.14m

Height of trampoline when on stands:

- fixed height stands - 2,200mm
- Safelift stands (high position) - 2,225mm, Safelift stands (low position) - 1,995mm

Options:

- 6mm x 4mm web bed with 126 steel springs
- 6mm x 6mm web bed with 118 steel springs

- Hydraulically assisted "Safelift" roller stands in place of the standard fixed height roller stands

Delivery:

We deliver trampolines to your premises using one driver. Trampolines cannot be lifted by one person so level or ramped access to your facility is required. Should level or ramped access not be available we can assist your staff to manoeuvre the trampoline into your facility if possible. If access is up or down stairs or similar then special delivery costs apply. If we deliver a trampoline and have not been informed in writing in advance that on-site assembly is required, the trampoline will be left at the entrance to your facility and we will provide a quotation to disassemble and reassemble it at a later date.

Special Delivery options:

OPTION 1 - if delivery is required to premises without level access and the trampoline is to be carried up or down ONE flight of stairs (without a return on the stairs) we deliver the trampoline without bed and springs attached to reduce the weight. We require you to provide 4 people to assist our delivery driver in carrying the trampoline. Once in situ the bed(s) and springs are left for the customer to attach. **Cost is an additional £58 + VAT per trampoline**

OPTION 2 - as per option 1 above, but our driver attaches the bed and springs which requires the assistance of 1 person provided by the customer. **Cost is an additional £173 + VAT per trampoline**

On site trampoline assembly:

If access is too small for the assembled trampoline frame, or if the stairs have a return, or if there is more than one flight of stairs we can deliver the trampoline in parts and fully assemble it on site. To do this we provide a delivery driver and trampoline assembly technician who undertake the complete delivery and assembly process. **Cost is an additional £545 + VAT per trampoline plus one "Area Charge" based on the site location.**

If ordering online, please select the additional special delivery options and add them to your basket when ordering
