Trampoline - Club model - 99 Series

230199XXXX

Details

99 series club model trampoline. This trampoline is exactly the same size as a competition trampoline as specified by the FIG, the governing body of trampolining.

Manufactured from heavy duty steel tubing, epoxy powder coated. Easily folded and transported. Supplied with coverall frame pads

This trampoline is supplied with either fixed height or hydraulically assisted "Safelift" roller stands. Safelift stands are a strongly recommended optional extra for this larger size heavier trampoline as they make set-up and fold-away easier and safer

Dimensions:

- Frame size: 5.2m x 3.05m x 1.15m.
- Folded size: 3.05m x 2.2m x 0.8m.
- Bed size: 4.28m x 2.14m

Height of trampoline when on stands:

- fixed height stands - 2,200mm
- Safelift stands (high position) - 2,225mm, Safelift stands (low position) - 1,995mm

Options:

- 6mm x 6mm web bed with 118 steel springs
- 13mm x 13mm web bed with 118 steel springs
- Hydraulically assisted "Safelift" roller stands in place of the standard fixed height roller stands
- Safety coaching sides. These are extension pieces to the trampoline framework running the length of the trampoline on both sides. These, along with extra width coverall pads provide an area where a coach can stand to coach the gymnast without affecting the performance of the trampoline. Some coaches prefer to coach in this manner, whilst others prefer to coach from the side of the trampoline - the decision to

specify or not to specify coaching sides is down to personal preference of your coaching staff. PLEASE NOTE: if you specify coaching sides, you cannot specify hydraulically operated Safelift roller stands as these items are incompatible.

We supply our trampolines with RED coverall pads as standard. If you want blue pads we offer those as a no cost option. Please specify in the notes to your order if you want blue pads.

Delivery:

We deliver trampolines to your premises using one driver. Trampolines cannot be lifted by one person so level or ramped access to your facility is required. Should level or ramped access not be available we can assist your staff to manoeuvre the trampoline into your facility if possible. If access is up or down stairs or similar then special delivery costs apply. If we deliver a trampoline and have not been informed in writing in advance that on-site assembly is required, the trampoline will be left at the entrance to your facility and we will provide a quotation to disassemble and reassemble it at a later date.

Special Delivery options:

OPTION 1 - if delivery is required to premises without level access and the trampoline is to be carried up or down ONE flight of stairs (without a return on the stairs) we deliver the trampoline without bed and springs attached to reduce the weight. We require you to provide 4 people to assist our delivery driver in carrying the trampoline. Once in situ the bed(s) and springs are left for the customer to attach. **Cost is an additional £58 + VAT per trampoline**

OPTION 2 - as per option 1 above, but our driver attaches the bed and springs which requires the assistance of 1 person provided by the customer. **Cost is an additional £173 + VAT per trampoline**

On site trampoline assembly:

If access is too small for the assembled trampoline frame, or if the stairs have a return, or if there is more than one flight of stairs we can deliver the trampoline in parts and fully assemble it on site. To do this we provide a delivery driver and trampoline assembly technician who undertake the complete delivery and assembly process. **Cost is an additional £545 + VAT per trampoline plus one "Area Charge" based on the site location.**

If ordering online, please select the additional special delivery options and add them to your basket when ordering
