

Rebound screen graphics / branding

Details

Continental is the only manufacturer of rebound screens offering rebound screens in 36 different colours - including timber effect and other attractive finishes to provide the bespoke solution for your five a side rebound boards.

You can now take that bespoke solution to another level with digitally printed graphics applied to your screens.

We can take any image / design / style you like and produce the graphics to your design from a typical 500mm x 500mm logo in the centre of each board to an image the full 2.4m x 1.2m size of each board - or even a continuous image along a run of boards. Your imagination can run wild!

We then permanently transfer the graphical image onto the rebound boards in our factory, or our installation engineers can apply them to your existing boards at your site.

Available on both socketed and freestanding rebound boards

Please contact our sales team to discuss your requirements and for a bespoke quotation.

PLEASE NOTE: We do not have in-house graphics design capabilities so we require you to provide the image / images in a format to suit our requirements.
