Junior training beams

01287XXXXX

Details

Suitable for school PE or gymnastics training use, these junior training beams are a key element in gymnastics development. Perfect for learning and developing balance, coordination and confidence.

The beams are 3.66m (12') long, have a durable extruded aluminium body fixed to epoxy powder coated steel legs, and are available in a range of styles:

Height options:

- floor model (height to the beam's surface is 150mm)
- 610mm (2') high (to the beam's surface)

Upholstery options:

- heavy duty gymnastics quality polypropylene carpet covered in seal grey
- suedette covered - the same material that covers our FIG approved competition beam to give gymnasts an introduction to the "feel" of the full size apparatus
