Safety mat "crash" mats for gymnastic landing activities

The mats have a combustion modified foam core. These mats have a soft touch cotton canvas cover (also available in a wipe-clean PVC cover - see here for details).

These mats feature velcro secured access seams to enable easy replacement of cover or foam inner.

If two safety mats are to be used adjacent to each other to create a landing area it is always recommended to use an agility mat on top of the landing area to ensure feet cannot go through the gap between the mats.

Please note that safety mats must not be dragged using the handles as this can damage the covers and handles. The mats should always be picked up using the handles and carried.

Safety mats are available in a wide range of sizes, dimensions, colours and cover types:
