GymShape - folding rectangle

Details

Designed for gymnastics training, stretching, balance and fun games, the GymShape Folding Rectangle is made from high density 28kg/m3 polyurethane foam covered in a high density, fire-retardant PVC in grey and red.

The GymShape Folding Rectangle comprises two incline shapes that can be used as follows:

- independently as two inclines
- back to back to create a double incline or up and down slope
- connected together using the supplied removable PVC backed VELCRO® Fastener strips to create a block

Incorporating a zipped removable cover for easy maintenance / cleaning / replacement.

- Dimensions: 1,400mm x 600mm x 500 / 100mm (each half)
- Weight: 22kg

This GymShape is part of a range of different shapes designed for different situations in your gymnastics training facility.

All Continental GymShapes are 100% Made in Great Britain in our own factory
