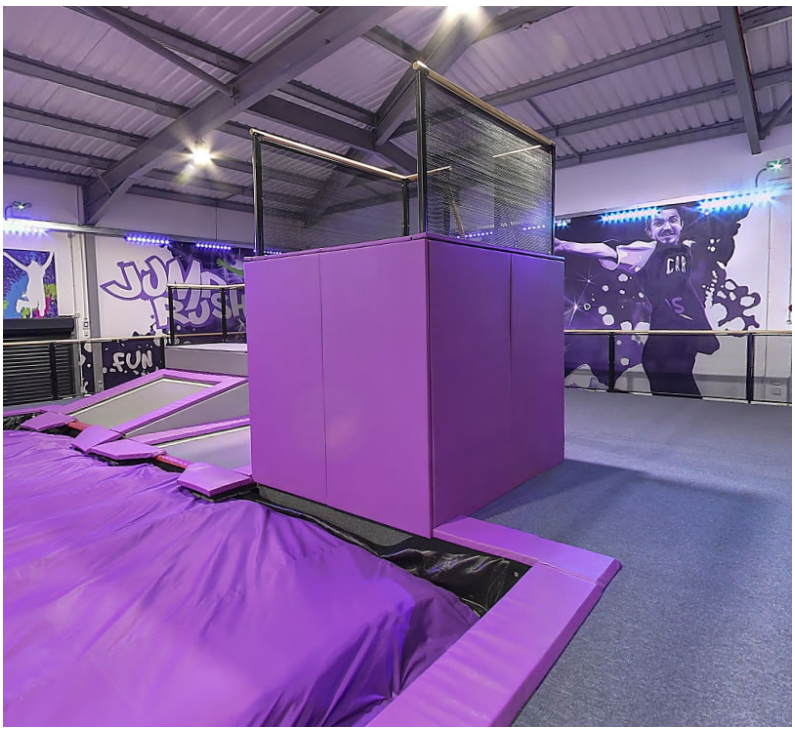
Dismount pit entry - jump box / jump tower



Details

One of the most exciting entry points into and airbag or foam pit is a jump box.

We manufacture jump boxes at heights of 1.2m and 2m (2m is the highest permissible under PAS5000)

We provide a steel framework onto which we fix padded panels covered in PVC

We install carpet covered steps and handrail up to the top of the box

Around the top of the box we fix balustrade and handrail to prevent participants accidentally falling off the jump box.
