

SkyPod Zone

Details

SkyPods are similar to reaction walls, but with added flexibility. We provide a longer track trampoline which requires sideways as well as vertical bouncing. You can challenge yourself to improve your times against the computer or challenge your friends to a contest.

We provide a cantilevered fully padded wall which ensures distracted bouncers land on the trampoline bed and not the frame pad. The padded wall has a "random" arrangement of SkyPods dotted around the wall. We can also provide a fully digitally printed SoftTouch cover to the wall that can either incorporate your logo or graphics, or even an image with the SkyPods strategically located for added fun.

SkyPods comprises of 5, 7 or 9 separate pods. SkyPods Duo (two sets of SkyPods) includes a Multi-player Launch console (MPL), enabling two players to compete against each other. Players hit the lights to score points both as a single user or during 1-on-1 duels and can be started straight from the pods or using the MPL.

Competitive Challenge

SkyPods encourage competition and the motivation to jump for longer. Players score points with every correct hit, competing individually to build a huge score or directly against another player (SkyPods Duo).

Flexible Layouts

SkyPods can be installed in any configuration of 5, 7, or 9 pods and as a competing pair. Your use of creative backing graphics will make them a compelling, eye-catching feature.

FreeStyle Fitness

Jump high, low, left, right - SkyPods give you a surprisingly intense workout. They are a great challenge of agility, reaction speed and mental alertness for players of all ages.

Make It Social

Players love to see their scores on social media – perfect for reposting and re-tweeting.

Durable

SkyPods are designed to be robust and offer trouble-free operation. Bullet-proof and easy swap-out LED pods and 12-month warranty on electronics.
