Battle beams

Details

Continental's battle beams are solid and stable beams fully covered in 50mm thick sturdy foam and upholsetered in durable PVC in any of our range of 22 colours. The beam can be a different colour PVC to the plinths

The beams are mounted onto plinths with a step to raise them up to a challenging (but safe) height above the pit below.

Battle beams are mounted above a resi-pit or foam filled pit for safety on landing.

Each beam is supplied with one pair of pugil sticks as standard. Due to the huge amount of wear and abuse experienced by pugil sticks they are considered wearable items. We can supply replacement covers for pugil sticks or entire sticks
