Padded suedette beam widener

Details

This padded beam widener is designed to fit all FIG approved / competition size ladies beams.

The cover is manufactured from 30mm thick Tribond foam upholstered to a layer of FIG approved beam suedette material which covers the top surface and sides.

The cover is 1.5m long and widens the surface of the beam from 100mm to 190mm.

This pad provides a firm, cushioned, wider surface for confidence building during the practice of new landings and dismounts.

Held in place with full length VELCRO® Fasteners on the underside (with cut-outs to suit the legs of Continental beams)
