Beam training pad

01286LM01AA

Details

Beam training pad.

This pad provides an additional 10mm of resilient lightweight foam in a double layer of FIG approved beam suedette.

The foam padding and double-layer suedette is on the top surface only. The sides are single-layer suedette.

The cover is secured in place using several quick-release VELCRO® Fasteners on the underside of the beam.

Ideal to leave attached to the beam during training sessions to provide additional cushioning to lessen the impact of repeated training on the gymnasts' joints.

Available in two lengths:

- 1.25m
- 2.5m

SKU	Options	Available Colours
01286L01AA	1.25m	N/A
01286M01AA	2.5m	N/A
