PVC dust cover for ladies balance beams

Details

This PVC beam dust cover is strongly recommended to protect the suedette cover of your competition size beam from dust and accidental damage from abrasion, and is ideal for multi-use facilities where the beam has to be stored when not in use.

The cover incorporates two pairs of brass eyelets which can be used to secure the cover in place (using cable / padlocks - not provided) to restrict unauthorised usage.

Supplied in red PVC as standard
