Asymmetric / uneven bars - standard model

Details

Standard competition asymmetric / uneven bars

This model of bars has previously been FIG approved and is still manufactured to current FIG specifications.

Complete with:

- rapid height adjustment mechanism
- fast cable tensioning mechanism
- wood laminated fibreglass core round rails

The high bar can be used individually without alteration to cables

Supplied complete with a set of cables and chains which require four floor anchors available at additional cost.

We offer two cable systems:

- Standard
- Short cable system - for installations where space is limited so that the anchors must be located closer together
