

Ringframe - competition model - FIG Approved

Details

FIG Approved competition ring frame

Manufactured from heavy gauge square section tube complete with laminated wooden rings supported on sprung swivels with pvc coated steel cables and woven nylon straps.

Including a double cable tensioning system.

This ringframe can also be supplied in a special reduced height version for use over a U-shaped pit

The ringframe is supplied complete with a set of cables and chains and requires 4 floor anchors which are available at additional cost.
