Rhythmic carpet storage trolley

Details

This trolley is ideal for facilities that need to take their rhythmc gymnastics carpets in and out of storage for use in a multi-use hall.

The trolley incorporates 4 removable aluminium poles with powder coated steel handles to roll the carpet sections onto. The poles can each accomodate up to 4m wide carpet rolls (a 14m x 14m competition carpet is normally made from 3 x 4m wide rolls and 1 x 2m wide roll)

The trolley has an epoxy powder coated steel frame and incorporates eight heavy duty swivel castors for easy manouverability into your store room.

Normally epoxy powder coated in red, the trolley is made to order and can be powder coated in a wide range of colours to suit your facility - please contact us if you have a special requirement.

The trolley is also availble with an optional pair of end pads and PVC cover to protect the carpet from dust, dirt and misuse. The end pads are to reduce the risk of injury to people from the poles covered by the cover.

The trolley is designed for rhythmic carpets but it can also accomodate 4m wide carpet rolls of any type of carpet.
