

ResiMat

023201A0X

Details

This new ResiMat from Continental is perfect to use above ground as a gymnastics soft landing block and in a recess for a resi-pit. The mat is also ideal for safety uses in theatre, TV, stunts etc. and for practising aerial or circus activities.

The foam is combustion modified and features a solid slab on the top and bottom of the mat with a perpendicular lattice construction inside to create air-gaps which readily compress on landing to enhance the softness of the landing.

The UltraMesh sides and ends provide virtually no resistance to the air from the air gaps escaping resulting in the softest landing of any of Continental's mats.

The ResiMat is available as standard with grey UltraMesh sides and ends and in your choice of PVC colour to the top and bottom sides of the mat

The ResiMat measures 3m x 2m as standard and is available in two choices of thickness:

- 600mm
- 750mm

If you wish to create a larger area, we can make the ResiMat in any dimensions. If you are using a number of ResiMats to create a landing area we recommend the use of a coverall (pvc top with UltraMesh sides) to prevent foot gaps and to stop the mats moving apart. Please contact us for a bespoke quotation to suit your size requirements. We can also provide the coverall using our SoftTouch material which can be fully digitally printed to provide branding opportunities to your facility.

The cover of this mat is zipped for easy removal / replacement.
