

ModuBlox

MDBLXSETXX

Details

What are ModuBlox? - We developed ModuBlox in conjunction with British Gymnastics to provide the ideal kit for Freestyle Gymnastics. The development of the equipment has been guided by Freestyle Gymnasts, Parkour specialists, Free runners and others to provide a robust, exciting, challenging and safe environment for Freestyle, Parkour, Free-running and other similar activities.

The blocks feature:

- Epoxy powder coated steel framework securely fixed to the wall / floors of your facility for stability
- Rounded corners for safety
- Ultra hi-grip 15mm thick laminated timber panels with a special hi-friction surface for grip
- Steel tube edges to the blocks enable finger grips when grasping or climbing

A bespoke solution for your facility:

Design of the layout is extremely flexible - height, length and width of the blocks is in 300mm increments to give tricking and balancing areas with 300mm high blocks right up to the highest platforms at 2400mm above the ground.

Extras include:

- Surfaces of the blocks can be padded for additional safety during learning phases
- Tribond cushioned flooring is recommended to be installed around and between ModuBlox
- Networks of bars for swinging moves
- Grab rails
- Flag poles
- Envelopes
- Ramps for backaways

We have provided details and pricing for 4 typical layouts, but the modular nature of ModuBlox enables us to design a solution that is just right for you. For budgeting purposes you can see the package of equipment in

the different standard sets below:

Elements included in each set:	Set 1	Set 2	Set 3	Set 4
Area overall	14m x 2.1m	14m x 4.3m	14m x 6.4m	14m x 8.5m
