

## Freestyle Gymnastics / Parkour foam ramp

## **Details**

These "urban look & feel" foam ramps are great for use in the hugely popular activity of Freestyle Gymnastics and Parkour.

The ramps are  $2m \times 1m \times 0mm$  to 600mm high. They can be used on their  $2m \times 1m$  base to provide a run-up to a 600mm high foam block, or as a ramp to help a run-up for vaulting over other apparatus such as our Parkour equipment and ModuBlox. They can also be used on their  $1m \times 600mm$  ends propped against a wall for practising back-aways and other Freestyle moves.

This foam ramp has the following features:

- The ramp surface and end have firm foam to enable standing on the ramp or for running at / up
- The cover is a high-traction "tarmac" embossed pvc for extra grip
- The pvc is "urban black" as standard

The ramp can be used in conjunction with a  $2m \times 1m \times 600mm$  Freestyle foam block to provide a wider range of activities and different heights.
