

Trolley for floor protection products

Details

This trolley is designed specifically to store 2m x 1m jumbo carpet tiles horizontally. It is also ideal for storing a set of canvas floor druggets.

The trolley has a 2m x 1.2m lacquered plywood platform and is specifically designed with heavy duty wheels to accommodate the heavy weights of jumbo carpet tiles (7kg per tile). The trolley can hold up to 100 jumbo carpet tiles or 600m² of canvas floor druggets.

The trolley has two fixed and two swivel wheels for easy manouverability.

Also suitable for other heavy duty loads such as a large quantity of high density judo mats.

The trolley uses extra heavy duty wheels to accommodate large loads. The trolley can accept up to 700kg of weight - please note it may take more than one person to move such a heavy trolley and if you have a cushioned vinyl floor then high weights may cause the wheels to dig into the floor - they will not damage the floor but it may be difficult to start to move a fully laden trolley of such a weight.
