

# COVERMASTER Ultima Series

## Details

Continental is delighted to bring the worldwide market leading gym floor cover from COVERMASTER™ to the UK.

Covermaster® Ultima Series Gym Floor Cover is the industry's best, most versatile and durable line of covers. Utilising the knife/spread coating method, the Ultima Series Gym Floor Covers are produced to superior standards, resulting in the most unique covers in the industry. Covermaster® Ultima Series covers are more resilient and will maintain their appearance longer, even under repeated use, since their coating cannot separate from the core.

Ultima is unique in the UK by being reversible - you have two sides that can both be used as the top surface - perhaps one kept for "best" for annual usage in graduation ceremonies with the other side being used more frequently for social events.

We offer three versions of Ultima - the Ultima 5000, 4000 and 3000. Please take a look at the different specifications and available accessories shown below, then contact Continental with the dimensions of your facility for pricing information:

### **ULTIMA 5000**

**A Heavy Duty, Extra Thick, Ripple Pattern, Slip Resistant Cover**

Usage per annum: unlimited

Usage: Heavy duty use / all events

**A HEAVY DUTY, EXTRA THICK, RIPPLE PATTERN, SLIP RESISTANT COVER**

- High wearing, decorative, ripple patterned top surface
- Thick outer wear coatings
- Superior tear resistance
- Can be used either side up
- Designed for high frequency use
- Suitable for any event
- In single or dual color combinations
- ADA compliant, anti-slip friction co-efficient rating of 1.80

For the ultimate in protection, COVERMASTER offers the ULTIMA 5000™. It's our thickest, most durable cover with a slip resistant surface. This superior model provides incomparable protection against possible damage from high heels, chairs, table legs and other abrasive items. One touch and you'll be convinced. Nothing else compares.

**Covermaster Ultima 5000**

**ULTIMA 4000**

**A Heavyweight, Diamond Tread-Plate Pattern, Slip Resistant Cover**

Usage per annum: 12 times or more

Usage: Dances, concerts, graduations, trade shows, career fairs, examinations

**A HEAVYWEIGHT, DIAMOND TREAD-PLATE PATTERN, SLIP RESISTANT COVER**

- Diamond tread-plate pattern, anti-slip top surface
- Can be used either side up
- Designed for high frequency use
- Suitable for any event
- In single or dual color combinations
- ADA compliant, anti-slip friction co-efficient rating of 0.61

This cover will guard against the rigors of heavy traffic events. Tables, chairs, even stage & sound setups are a matter of course. The desert sand side, with its anti-slip, diamond tread-plate pattern, is best for graduations and commencements, when decor is more important. The darker side is ideal for dances and concerts.

**Covermaster Ultima 4000**

## ULTIMA 3000

A Deluxe, Highly Decorative, Holographic Cube Pattern, Slip Resistant Cover

Usage per annum: 10-12 times

Usage: Dances, graduations, examinations, shows

A DELUXE, HIGHLY DECORATIVE, HOLOGRAPHIC CUBE PATTERN, SLIP RESISTANT COVER

- Exclusive decorative, holographic cube pattern, anti-slip top surface
- Value priced
- Can be used either side up
- Designed for high frequency use
- ADA compliant, anti-slip friction co-efficient rating of 0.66

The twilight gold, holographic cube pattern, slip resistant surface is perfect for more formal occasions because it will give your gym a strikingly decorative look unlike any other cover. The dark grey side is perfect for any heavy duty event. Strong and durable, the cover meets all requirements to convert a gym for multi-purpose use and will stand up to repeated use for years to come.

Covermaster Ultima 3000

## COVERMASTER™ Ultima Accessories

### ULTIMA SERIES COVERMATE™

Covermaster's gym floor cover handling system, the Ultima Series COVERMATE™ is unique. It is the only storage system in the industry designed by certified professional engineers. Ultima Series CoverMate™ embodies a wealth of incomparable advances in safety and handling. With patents pending on all proprietary engineering and safety components, Ultima Series COVERMATE™ will stand alone for many years to come. While many look-alike systems have since appeared, none have been designed according to acceptable safety standards. Meanwhile, Covermaster continues to lead the way in the industry innovations. The Ultima Series COVERMATE™, a totally redesigned system, is the result of more than 20 years of hands-on experience, numerous stability tests and extensive user feedback. With its many new floor cover handling and safety aspects, the Ultima Series COVERMATE™ incorporates leading edge design that makes it the easiest-to-use cover installation, removal and storage system. Ease of handling and storage were central to its development. Thanks to professional engineering and the use of premium, stronger components, Ultima Series COVERMATE™ lifts gym floor cover handling to a whole new level of safety, convenience and durability.

### **Extendable Safety Outriggers**

The bright orange outriggers are key to the safety aspect of Ultima Series COVERMATE™. In their extended position it is virtually impossible for the system to be tipped over. And because the outriggers run on their own casters, Ultima Series COVERMATE™ can be moved about the gym with ease.

### **Powder Coated Tubular Frame**

Ultima Series COVERMATE™ gets its robust strength from the rectangular frame made from 1 1/2" and 2" tubular steel. Powder coated in a rich silvery color, the entire system is as pleasing to the eye as it is outstanding in its performance and ease of use.

### **Non-Marking Casters**

Each of the 6 Colson brand casters on Ultima Series COVERMATE™ feature 3/4" thick non-marking Santoprene® SofTreads which are designed specifically for hardwood gymnasium floors. These noise-less, smooth running treads are a key feature of the precision engineered, ball bearing casters.

### **Foot Lock**

Custom engineered, this patent pending, foot operated anchoring device locks Ultima Series COVERMATE™ in place. Simply push the square pedal down to lock. To unlock, just step on the release. There are two foot locks, one on either end. No need to search for caster brakes, as the locks are bolted to the frame.

### **Roller Collar**

Each cover roller is fitted with a yellow collar to prevent side-ways movement of the roller. The collar also guards against the possibility that fingers get caught in between the roller and the bracket. Note the safety bolt above the roller that prevents roller 'pop-up' during use.

### **Roller Brackets**

The patented, rubber mounted, polycarbonate roller brackets feature Delrin roller bearings. Their smooth action allows each cover section to roll on and off Ultima Series COVERMATE™ with a minimum of effort. A safety bolt prevents roller 'pop-ups' during cover removal while not interfering with the free turning of the roller.

### **Hand Cranks**

Ultima Series COVERMATE™ comes with two portable hand cranks. These one-piece cranks are made of incredibly strong Lexan polycarbonate for heavy duty use. The long slotted mouth piece fits snugly into the roller for a secure fit and positive cranking action. If dropped accidentally, it will not damage hard-wood floors.

### **Roller Clips**

The specially molded, push-on Quick Clips are made of

flexible plastic to avoid possible injury. The plastic clips quickly attach the cover sections to their rollers. Just hold the cover against the roller, then slide the clip down and over until it locks in place. The cover is now ready to be rolled back up.

### **Storage cover**

Available at additional cost, this attractive storage cover keeps your CoverMate™ system and the gym floor cover clean and ready for the next event. It also discourages unauthorized use and reduces the need for cleaning. Supplied in a plain colour as standard, but also available with bespoke printing.

### **PowerMate™ ELECTRIC WINDER**

**IT'S EASY TO REMOVE A GYM FLOOR COVER...WITH POWERMATE™**

To remove a gym floor cover from the floor, simply attach each cover section to its roller and wind it back up with the two standard hand cranks.

Or get the optional PowerMate™, a heavy duty power winder with as much as 270 ft-lb of torque that handles the largest and heaviest of gym floor covers. It makes an easy job even easier!

#### **PowerMate™ Features**

- Portable power winder
- One-hand operation when engaged
- Power assists in rolling up cover sections
- Special adapter head fits inside roller end
- Forward/reverse switch
- Light, compact design
- Includes plastic storage/carrying case
- Slotted, 6" long coupler secures a connection

**TapeMate™ WITH SEAMING TAPE**

TapeMate™, our practical, easy-to-use, walk-behind tape dispenser, is a much easier and faster way to tape a cover. No more crouching to hold down the cover sections! Made of enamelled, heavy gauge steel, the front wheel applies the tape as you walk it along. Ergonomically designed, the handle adjusts to any person's height, making TapeMate™ very comfortable and easy to use for anyone. The drop-in-place tape support allows for fast roll changeover.

COVERMASTER Seaming Tape is Specially formulated, extra strength, clear tape that's easy to remove and leaves no messy glue residue behind.

- 75mm (3") wide x 33m long per roll
- 16 rolls per carton
