

Wall to floor bench seating

Details

Manufactured by Continental bespoke for your facility, this wall to floor bench seating is our most popular changing room benching.

The bench slats are available in your choice of two materials, both of which are invisibly fixed to the seating brackets with no fixings visible on the top of the seating slats:

- Three runs of natural solid white beech with clear lacquer
- Two runs of 22m thick solid grade laminate

Standard dimensions are:

- Height: 457mm
- Depth: 345mm
- Length: any length to suit your requirements

Steelwork is epoxy powder coated in a range of standard colours. Click here to see our standard range of [Solid Grade Laminate](#) and [epoxy powder coating colours](#).

When ordering online, please select the total number of linear metres of benching you require. We will then contact you to obtain drawings or to take measurements of your facility and provide bespoke drawings to suit. If any adjustments to overall lengths are required at that stage we will make an adjustment to the final cost prior to manufacture.

This seating must be fixed to a solid wall (i.e. blockwork or brickwork) and the legs are designed to be fixed to the floor using fixings hidden inside the feet.

The price shown above is PER LINEAR METRE and a modest AREA CHARGE will be added to your basket at checkout to reflect the costs of travelling to your site to undertake installation - you can see the Area Charge based on your postcode in the pricing box to the right
