TeamGym Safety Strips

Details

The UEG Directives on TeamGym require the use of safety strips located at the sides of the TeamGym tumble track immediately in front of the landing area.

The strips are attached by VELCRO® Fastener flaps to the edges of the tumble track.

Continental's safety strips are sold as a pair and each strip measures 3m x 0.5m x 0.35m and incorporates a velcro flap to attach to a suitable TeamGym tumble track.

The strips are made from fire retardant safety mat foam covered in red PVC.

PLEASE NOTE: Price is for one pair (two) safety strips
