Junior Gym Component - SHORT inner upright

Details

These inner uprights slide inside the outer frames to allow height adjustment on the lower bar level for asymmetric bars, parallel bars or rebounder bungees. The price is for each upright and two uprights are needed for each rail or bungee.

Continental's range of Junior Gym equipment is modular so you can buy a basic element and then add components to enable you to build the different elements in the range. To enable you to select any additional components the table below shows the number of each component in each element:

	Double rebounder	Single rebounder	Uneven bars	High bar	Parallel bars	Ring-frame
Base rails	2	2	2	2	2	2
Upright outer frame	2	1	2	1	2	1
Short inner upright	4	2	2		4	
Long inner upright			2	2		
Ringframe inner upright (no ring or strap)						2
Veneered fibreglass rail			2	1	2	
Bungee cables with fittings	2	1				

Padded bungee cover	2	1				
Rebouder rail (solid timber) with brackets	1	1				
Ring and strap						2
