

Basketball backboard - timber matchplay

Details

We manufacture our own basketball backboards in-house.

Matchplay size boards are made from 25mm thick black laminate faced and edge-banded MDF with a white painted background to provide crisp definition to the board markings.

The edge-banding around the board protects the MDF from damage when hit by balls on the edges of the board

These boards will give you years of trouble-free usage.

The board is supplied un-drilled so you will need to drill the board to suit your ring and mounting.

The price shown is for one board only **SUPPLY ONLY**
