

Cricket bowling machine

Details

Professional model cricket bowling machine with enclosed ball delivery wheels for safety.

This NEW model incorporates a completely new control panel with ePaper high resolution display. This allows for an expanded display with enhanced functionality and multiple user-definable options.

The new display shows:

- speeds in kph or mph
- a session ball count
- a session timer
- user selectable random increment function for competitive practice sessions.

The machine features:

- Variable speed adjustment in 1 mph increments between 15 and 95mph
- Spin, swing and pace bowling with 19 swing and spin settings
- Balljoint adjustment complimented by Vernier adjusters for precision line and length deliveries.
- Electronic random variation facility
- Solid state electronic wheel braking

Supplied with a set of legs to support the machine at the correct height for bowling

Supplied WITHOUT any balls which must be purchased separately

Supplied as standard WITHOUT a power supply . A power supply is necessary to suit your intended usage. Power supplies available:

- Power Supply - for use indoor with mains power
- Battery Pack - for use outdoors or indoors if no plug socket is available. The battery pack is supplied with a charger.
