Bushing cover suction cup removal tool

Details

This rubber suction cup is used for the removal of circular bushing covers in sports hall floors that are used to provide access to gamespost anchors and sockets in some sports hall floors.

Simply press down on the rubber suction cup which adheres it to the cover and pull the ring to remove the cover.

The small tabs on the side of the suction cup are squeezed to release the vacuum so that the rool is released from the cover.

This suction cup is suitable for lacquered timber sports floors or plain coloured vinyl floors - it does not work with timber effect vinyl as the grain effect prevents creation of a strong enough vacuum.
