Small cube

24CUS2004XX

Details

The small Cube is slightly lower than the large cube with its height of 1600mm. But with respect to its variation possibilities it is a perfect match for its "big brother"

Features:

- more than 70 plug-in connections for bars and beams
- weatherproofed multiplex birch plywood
- sidebars made of solid wood
- glue-laminated and screwed corner joints
- special lamination for a better grip
- safety and stability due to a non-slip underfloor plate
- stable, integral, retractable moving device

The cube is available in two variants:

- Standard
- With door

The "with door" version has a removable panel on one side of the cube to enable you to put in additional weights (Item 24CUS2059 –please add to your order), in order to increase stability of the Cube e.g. for professional Parkour shows

SKU	Options	Available Colours
