Wall mounted practice basketball goal

Details

Too many "outdoor" wall mounted basketball goals sold in the UK are not actually weatherproof. Some have plywood backboards which fail quickly in wet weather or UV and heat. Others use simply powder coated steel which quickly fails so that the brackets rust and create unsightly marks on your walls and ultimately fail.

To address this gap in the market, we are pleased to launch the UK's first and only fully galvanised wall fixed basketball goal.

The goal freatures:

- 100% galvanised (hot dipped zinc plated) to prevent the steel bracketry from rusting
- Zinc plated fixings and mounting bolts
- Cast acrylic backboard (100% recycled acrylic with no virgin plastic content)
- Practice size backboard: 1,200mm x 900mm
- The only 100% galvanised basketball ring available
- Polypropylene rot-proof net
- 300mm projection from the wall to the backboard

The goals are sold EACH (not a pair) and supply only for you to fix to the wall following the supplied instructions
