Indoor steel handball goals

Details

These goals comply with the IHF regulations for handball - using 80mm steel frames epoxy powder coated in red with white markings to provide a striped goalmouth. The goals measure 3m x 2m and are supplied complete with nets.

The goals feature folding side-frames and have integral flip-over wheels to enable the goals to be transported easily to and from your store room.

The price is for a PAIR of goals.

The goals MUST be secured when in use to ensure they are safe. This requires four gamespost floor anchors for one pair of goals (2 anchors per goal) - please contact us for details and a price.

Don't forget - these goals are the same dimension as Futsal goals so they can also be used for Futsal!

PLEASE NOTE: As standard these goals are provided in RED and WHITE, but can be manufactured in other colours such as YELLOW and WHITE, BLUE and WHITE or BLACK and WHITE to suit your facility
