

Spring collars (PAIR)

Details

Until now this simple piece of kit has tended to be over-complicated and over-designed, causing a huge issue for facility users for many reasons:

Some have too much resistance for some users to effectively open. Some also struggle to move effortlessly along an Olympic Bar.

These simple Spring Collars were created to be easily usable for people of all grip strengths and to move effortlessly along Olympic bars. They can be firmly attached to all Olympic style bars.

These cost effective Olympic Spring Collars lead to less frustration and therefore more enjoyable workouts for your facility users.

Furthermore, durability was the foundation of the product design. Expect long life with our Olympic Spring Collars and happier facility users.
