Sports hall line markings

Details

Continental is pleased to offer a sports hall line marking service.

We can provide a Sport England and National Governing Body compliant line marking drawing. We ensure the sports equipment and lines are coordinated to avoid any conflict between lines and secondary steelwork / plinths / sockets for sports equipment.

Technical Information

We then paint lines using sports line marking paint approved by the manufacturer of your floor. We can mark all types of polymer (vinyl or similar) floors and timber floors.

If your floor type requires a lacquer after application of the lines (e.g. Junckers or Boen timber floors) then we also provide and apply the lacquer recommended by the flooring manufacturer.

Please contact us for a price to carry out this work. To provide a quotation we require:

- Dimensions of your hall
- Number and type of the courts you require marking
- Site location postcode
- Confirmation of whether this is a brand new floor or an existing floor

The video below is a time-lapse of a large timber floor line marking project that we undertook that shows the process for marking a timber floor:
