Combat, prison officer and police training

Details

We have in-house skills in the design, manufacture and installation of matting, wall padding, gymnasium equipment, martial arts equipment and similar equipment.

These skills are often called up on for bespoke solutions for combat training rooms such as:

- Violent man training rooms - including floor, wall and column padding
- Crowd simulator training - training areas for police using special heavy punchbags and padded walls and columns to provide a simulated crowd environment
- Control & restraint training rooms - in police training facilities and prisons to assist with the training of officers in these skills

Please contact Continental to discuss your particular requirements - no request is too outlandish!
