Indoor tennis hall perimeter drapes

Details

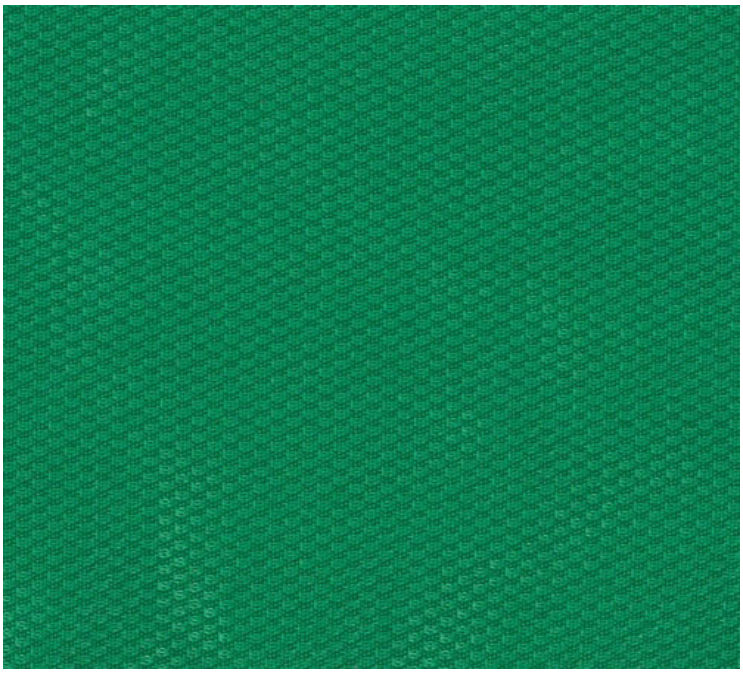

We manufacture and install bespoke drapes to the ends of indoor tennis centres, as per the LTA specification. These drapes provide a consistent coloured wall against which it is easy to see the ball without distraction. They also catch and drop the ball to try to keep balls close to the ends of the court rather than ricocheting them back onto the playing surface.

Many centres also require drapes to the end walls on aesthetic grounds which we install to suit. We can install the side panels using taught fabric panels to provide a smooth surface onto which advertising panels can be attached

As we manufacture these drapes bespoke we can also offer a range of options:

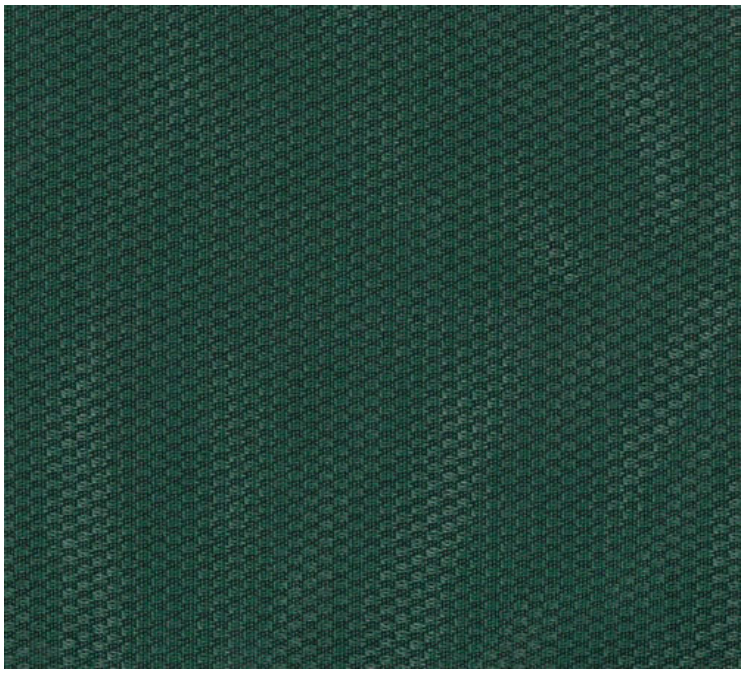

- Fixed drapes on taught steel cables
- Retractable drapes on aluminium trackway with trapped runners
- Permanent infill sections above the drapes to follow the roof profile
- Pull-off Fire Exit panels
- Netting sections to provide viewing panels from mezzanine areas or through viewing windows

Please contact us with your specific requirements - our designers will be pleased to propose solutions to suit your facility. We generally use our Trevira fabric in four colours - two blue and two greens - which suits most tennis facilities, but we can offer bespoke colours (subject to minimum order quantities) and other fabrics if you have specific requirements. Our standard colours are shown below:

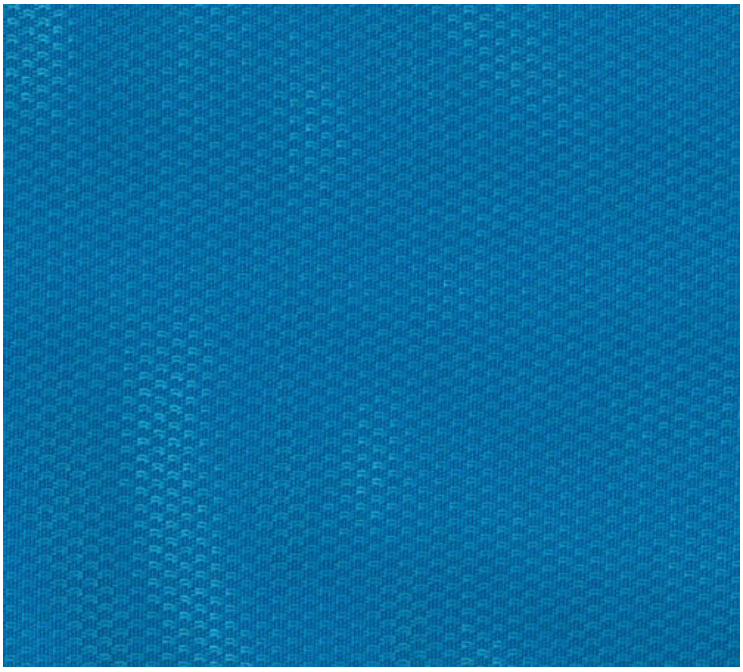

Emerald Green

Close match for painting / impact boards: RAL 6032 Signal Green

Wimbledon Green

Close match for painting / impact boards: RAL 6005 Moss Green

Continental Sports Limited. Hill Top Road, Paddock, Huddersfield, West Yorkshire HD1 4SD. Registered in England & Wales No: 00830200. VAT No: 516 3500 76
