

Impulse Encore Treadmill

Details

This high performing running machine is designed for use in busy commercial environments across multiple sectors.

This high-quality model is built to last even in high usage situations. Complete with a simple but effective console also which offers all the readouts, feedback and workout options users cite as being most important in their training. The 3D fixed upright has been designed to eliminate the console vibration found in many treadmills when the user is running at a quick pace.

This treadmill boasts a rust-resistant undercoat and a reversible deck allowing for a greater lifespan of the components. The maximum user weight this machine is built to allow is 150kg/330lbs and it is capable of a max speed at 20kph with incline of up to 15 degrees.

The wide running surface of 56cm and the quiet operation, gives the user confidence on the machine.

Features:

- Pulflex Commercial Suspension System provides superior running feel
- Reversible deck for longer product life span.
- Incline range from 0-15% and 1-20km/h speed range
- 56cm wide running area
