JOOLA - Outdoor J500A outdoor table tennis table

Details

The JOOLA Outdoor J500A is an outdoor table tennis table for the highest demands. The weatherproof, 6mm thick table surface made of aluminum composite material is lacquered in a complex process and sets standards in terms of outdoor playability with its even ball bounce.

The transport system with 8 large, lockable castors on 15cm diameter castors per table-half ensures excellent mobility, even in the rather uneven outdoor area, and at the same time guarantees stability and safety.

The table legs are height-adjustable, which enables an uncomplicated level playing surface.

The two separate halves of the table are foldable so that the table tennis table can easily be converted into a solo game mode.

The JOOLA Outdoor J500A is delivered 95% pre-assembled and can therefore be set up in just 15 minutes. A weatherproof table tennis net with a practical clamping mechanism is included in the scope of delivery.
