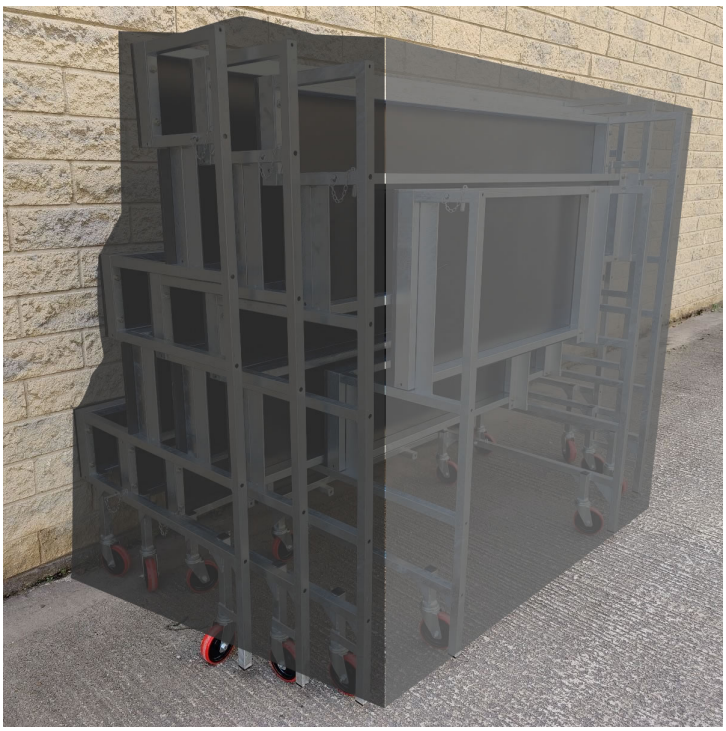
PVC cover for spectator seating



Details

This PVC cover has two VELCRO® Fasteners down the front side to enable the cover to be easily put in place and removed.

Brass eyelets in the bottom corners enable the cover to be secured using your choice of cable ties, bungee cords, twine, chain or similar (not supplied)

We strongly recommend that outdoor sets of galvanised spectator seating are stacked and covered using this cover to protect the units from long durations of inclement weather

Supplied in grey as standard but available in all other PVC colours as standard
