Impulse IF93 Chest Press

Details

Impulse IF93 Chest Press machine

Single station strength machine for chest and triceps. The assisted foot support allows users to control the weight stack from start to finish during exercise which helps to prevent injuries, while a dual hand grip design and adjustable seating position allows the chest press to accommodate different users types.

The chest press machine is specifically designed for entry level studios and commercial gyms and offers a complete functional package that is easy to maintain.

The specially designed pads have different angles to allow them to suit different users to target muscles with greater effect through a full range of motion.

PLEASE NOTE: This item is delivered flat-packed and requires some self-assembly. Please contact us if you require a cost for installation and commissioning in your facility
