Impulse IF93 Seated Leg Curl

Details

Impulse IF93 Seated Leg Curl machine

The Seated Leg Curl is designed to enhance leg workouts and allow users to develop the lower body hamstring muscles through leg curling. It features adjustable foam rollers designed to keep users safely/comfortably locked in place and help reduce injury. Both the back pad and foam rollers are adjustable therefore can accommodate different types of users, while the yellow circle pivot helps users to maintain the correct position during their workout.

The seated leg curl machine is specifically designed for entry level studios and commercial gyms and offers a complete functional package that is easy to maintain.

Key Features

- Develop lower body hamstring muscles through leg curls
- Adjustable back pad and foam rollers to suit different types of users
- Yellow circle pivot helps users to maintain correct form during workouts
- Foam rollers securely lock to keep users safe and reduce injury risk
