

Impulse IF93 Dip Press

Details

Impulse IF93 Seated Dip Machine

The dip press allows users to train triceps and anterior serratus. The "T" shaped handlebar design helps to ease pressure on the arms and wrists making it more comfortable when training. The negatively angled adjustable backrest is shaped specifically to give user better support and adjustable seat pad can be adapted for users of different height requirements.

The seated dip machine is specifically designed for entry level studios and commercial gyms and offers a complete functional package that is easy to maintain.

The specially designed pads have different angles to allow them to suit different users to target muscles with greater effect through a full range of motion.

Key Features

- "T" shaped handlebars design eases pressure on the arms and wrists when training
- Negatively angled adjustable backrest is shaped for better support
- Adjustable seat pad can be adapted for users of different heights
