Cricket matting (SPECIAL LENGTHS)

06840B01ABXX

Details

Indoor cricket matting is essential to protect your sports hall floor from cricket balls and mats and also to deaden the rebound from a sprung sports floor to provide a rebound closer to that of an outdoor cricket wicket. This matting provides an even pace wicket with true bounce providing both batsmen and bowlers with a realistic practice playing surface.

Manufactured from green nylon carpet, the matting has a bonded heavy duty ribbed synthetic rubber backing

The matting is supplied 2m wide. As standard the rolls are 11m long to comply with ECB's TS3 guidance for use with indoor cricket in multi-sport facilities, but we also offer it in any length from 6m to 33m. The price per metre is higher for non-standard lengths due to the waste material from full roll lengths - the best value lengths per metre are 11m, 22m or 33m.

We strongly recommend all cricket matting is stored on a wooden creel which is available at additional cost. The images above show the cricket matting rolled onto storage creels. The creel ensures the matting is rolled properly and protected when in storage and the integral handles enable the matting plus creel to be carried easily.
