

Outdoor MUGA roof netting

Details

If you have an outdoor area that requires roof netting to prevent balls leaving the area then we have a range of solutions.

From MUGAs on the roofs of buildings, to playgrounds with neighbouring houses, we have a suitable netting solution for your needs.

We offer a range of mesh sizes taking into account projectile sizes, risk of bird entrapment, and likelihood / implications of impact.

We can provide a range of fixing methods including taught PVC coated steel cables with bottle tensioners, to embedded steel uprights and many more to suit your building.

Please contact our sales / design team to discuss how we might provide the perfect solution for your project
