Sports barn basketball goals

Details

Increasingly budget focused schools are constructing "covered MUGAs" - technically outdoor spaces but with covers over that are not entirely weatherproof.

We can manufacture fully galvanised sideways hinged and roof mounted basketball goals for these types of facility. Using Perspex backboards these goals can cope with the type of atmospheric conditions found in these spaces that are partly open to the elements.

We can also provide weather-proof dividing curtains using waterproof materials, aluminium track, plastic runners and galvanised steel bracketry.

There is no need to compromise on your sports equipment provision in your sports barn - contact our sales team for a discussion regarding the equipment we can provide
