Folding shot clock brackets for SAM backstops (PAIR)

Details

We manufacture these brackets to hold shot clocks on the boom of Schelde SAM portable basketball backstops

As standard we manufacture the brackets to suit Stramatel 1-sided shot clocks, but we are able to manufacture them bespoke to suit and shot clocks (we require the clock manufacturer to provide a fixing location drawing)

The brackets fold to lower the clocks to enable to the unit to pass under store doors and lock into place using a thumbscrew

The brackets are manufactured in steel and epoxy powder coated in white as standard

The price is for TWO brackets to suit a pair of backstops
