Match hockey goal weights

24HUHOC12W

Details

Match hockey goals are freestanding but must be secured when in use - this can be achieved by various means such as securing to a fence or counterbalance weights or U-pegs into grass pitches. These Match Hockey Weights provide the goals with back bars incorporating integral weights to ensure the stability and safety of the Match Hockey Goals without additional securing

This robust weight system easily attaches under existing wheels, providing reliable support during game play. Not only this, but they allow the wheels to glide seamlessly when relocating or moving your goal.

Available in two weights:

- 60kg (per goal) - sufficient to comply with British and European safety standards
- 89kg (per goal) - required to comply with FIH Class 2 standards

The prices shown are weights for a pair of goals. Each set comes with:

- 2 Hockey Back Tubes
- 2 Axle Bars
- 4 Solid Ballasts
- All Bolts & Fixings

Specification:

- Electroplated and Powder Coated Steel Brackets
- Ø76 Steel Ballast Tube
- Ø50mm Solid Steel Ballast Bars
- Ø130mm Powder Coated Aluminium Housing Tube
- Assembly Instructions
