

4G Swivel Weighted Portagoal

24HUFBL86X

Details

The ultimate portable goal that combines an integral weighted back bar into our British and European Safety Standard aluminium frame section, along with revolutionary 360° swivel wheels that glide effortlessly across all terrains, including gravel and muddy pitches. This innovative design is the result of direct feedback from Premier League football coaches, who requested the safest, strongest and easiest to move football goal. The 360° rotational wheels offer superior movement in every direction, allowing the goal to be turned backwards, forwards and sideways without any restrictions

Specification:

- British engineered to deliver the highest expectations of quality and world-class performance
- Manufactured from the latest aluminium football goal section that confirms to British and European Safety standards BS EN 748 - with a side frame that contours up and over the wheels that are mounted in-line with the side frame
- Uprights, cross bar, side bars and back bar are made using premium grade aluminium section that are polyester power coated in white using our in-house plant for a corrosion resistant market leading finish
- Back bar features 2 x integral weight insert ballasts to provide enhanced safety. These weights have been designed specifically to slot into the goal frame with ease, preventing overturning and guaranteeing safety. For performance, durability and safety it makes it the ultimate portable football goal
- Net supports are manufactured from 31.8mm pre-galvanised steel and are also polyester powder coated in white for longevity
- The wheels are a large 260mm diameter cellular swivel for easy manoeuvrability in all directions and through tight spaces such as gates. They move effortlessly on all terrains including up and down slopes, across gravel, muddy and synthetic pitches as well as the most difficult of Sunday league surfaces.
- While it is recommended that two people move these football goals, the manoeuvring process is lightweight and effortless enough to be undertaken by one person
- The goals have good ground clearance to prevent the bottom of the frame catching on the ground during movement, and rear wheels are fitted with brakes to help prevent any movement in play
- To guarantee optimal performance and mobility across uneven and muddy pitches, the 360° swivel wheels have been designed with a deep diamond tread which prevents sinking into the ground. Made

from heavy-duty polyurethane, the puncture-proof tyre encases a robust polypropylene wheel for unbeatable durability and reliable performance.

Optional wheel protection pads are available – ideal for goalkeeper training. Manufactured from 25mm chip foam covered with hard wearing PU coated nylon and hook and loop velcro securing straps. The pad covers the wheel and side frame and sits 25mm above the playing surface. Wheels still move freely with the pads fitted.

Sold complete with FPX style extra strength 4mm knotted net with a 100mm mesh for a long lasting durable performance
