4G Swivel Weighted Portagoal - 9v9

Details

This unique training goal is manufactured from the latest 4G aluminium football goal section, with a side frame that contours up and over the wheels mounted in-line with the side frame.

Specification:

- Size 4.88m x 2.13m.
- Sold complete with tailored 4mm net.
- Net supports are manufactured from 31.8mm pre-galvanised steel and then powder coated white for extra corrosion resistance and attractive appearance.
- The wheels are large 260mm diameter cellular swivel wheels for easy manoeuvrability on natural grass or artificial turf pitches.
- The rear wheels are fitted with brakes to help prevent any movement in play.
- Conforms to the latest British and European Standards BS EN 16579

Optional wheel protection pads are available – ideal for goalkeeper training. Manufactured from 25mm chip foam covered with hard wearing PU coated nylon and hook and loop velcro securing straps. The pad covers the wheel and side frame and sits 25mm above the playing surface. Wheels still move freely with the pads fitted.

Sold complete with FPX style extra strength 4mm knotted net with a 100mm mesh for a long lasting durable performance
