Covered outdoor cricket facilities

Details

Continental Sports is delighted to provide the netting fitout of Covered Outdoor Cricket Facilities - the latest initiatiave from the ECB to grow the game of cricket in the UK

Working with our partners Cricket Shield™ by total-play Ltd who provide the building infrastructure, lighting and flooring, we have recently fitted out two of the first facilities in the UK with:

- Perimeter tensioned netting
- Individual lanes and blinkers
- Roof netting
- Padded pelmet protected trackway
- Corner post padding
- Access doors
- Dual purpose storage envelopes that become sightscreens behind the batsmen
- Galvanised steelwork support bracketry

We work closely with Total-Play who project manage the entire process with Continental providing the cricket netting fitout into a structure with flooring and lighting provided by Total-Play

Total-play provides a complete turnkey service from conception to an entire operating facility including all ground investigations, local searches, augmented images, planning submissions and project management with the netting and ancillary equipment designed, manufactured and installed by Continental.

For specification and advice from the ECB please see the following documents:

Covered Outdoor Cricket Facilities – Developing Your Project is an introductory guide to the facility, how they can be used and how to get your development project off the ground.

Covered Outdoor Cricket Facilities – Design Guide provides detailed design guidance on everything you will need to make your project a success. The document is written to support project sponsors, design teams and specialist contractors on covered outdoor cricket facility projects and to set minimum ECB standards for successful project.
